1. The Government of India has decided to increase the number of seats in the Indian Medical Service from 100 to 150. This decision was taken after a long and careful consideration of the requirements of the service and the needs of the country. The increase in the number of seats will enable the Government to recruit more medical officers and to provide better medical services to the people of India.

2. The Government of India has also decided to increase the number of seats in the Indian Engineering Service from 100 to 150. This decision was taken after a long and careful consideration of the requirements of the service and the needs of the country. The increase in the number of seats will enable the Government to recruit more engineering officers and to provide better engineering services to the people of India.

3. The Government of India has also decided to increase the number of seats in the Indian Forest Service from 100 to 150. This decision was taken after a long and careful consideration of the requirements of the service and the needs of the country. The increase in the number of seats will enable the Government to recruit more forest officers and to provide better forest services to the people of India.

4. The Government of India has also decided to increase the number of seats in the Indian Police Service from 100 to 150. This decision was taken after a long and careful consideration of the requirements of the service and the needs of the country. The increase in the number of seats will enable the Government to recruit more police officers and to provide better police services to the people of India.

5. The Government of India has also decided to increase the number of seats in the Indian Civil Service from 100 to 150. This decision was taken after a long and careful consideration of the requirements of the service and the needs of the country. The increase in the number of seats will enable the Government to recruit more civil officers and to provide better civil services to the people of India.

6. The Government of India has also decided to increase the number of seats in the Indian Administrative Service from 100 to 150. This decision was taken after a long and careful consideration of the requirements of the service and the needs of the country. The increase in the number of seats will enable the Government to recruit more administrative officers and to provide better administrative services to the people of India.

7. The Government of India has also decided to increase the number of seats in the Indian Legal Service from 100 to 150. This decision was taken after a long and careful consideration of the requirements of the service and the needs of the country. The increase in the number of seats will enable the Government to recruit more legal officers and to provide better legal services to the people of India.

8. The Government of India has also decided to increase the number of seats in the Indian Revenue Service from 100 to 150. This decision was taken after a long and careful consideration of the requirements of the service and the needs of the country. The increase in the number of seats will enable the Government to recruit more revenue officers and to provide better revenue services to the people of India.

# THE INDIAN MEDICAL SERVICE (REVENUE) ACT, 1911

## Section 1. Short title and commencement.

1. This Act may be called the Indian Medical Service (Revenue) Act, 1911.

2. It shall extend to the whole of India.

## Section 2. Definitions.

3. In this Act, unless the context otherwise requires, the following expressions shall have the meanings hereby assigned to them, to-wit:

## Section 3. Interpretation.

4. The expression "medical officer" shall mean any person who is appointed to the Indian Medical Service.

## Section 4. Recruitment.

5. The Government may, by order in writing, direct that any person who is qualified to be appointed to the Indian Medical Service may be appointed to the service.

**Hypothesis 1:** The effect of the perceived risk of being caught will be positive and significant.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

The *Journal* recently published a special issue on "Economic Development, Institutions, and the Role of the State," edited by Robert R. Putnam and David E. Collier. The issue contains a collection of essays that explore the relationship between economic development and the role of the state. The essays are written by leading scholars in the field and provide a comprehensive overview of the current state of research on this topic.
